**DETAILED ACTION*****Reasons for Allowance***

1. The following is an examiner's statement of reasons for allowance:

a. Claims 1 - 3 are allowable over the Prior Art of Record because it fails to teach or suggest a method of reducing an n-order component of a radial run out (RRO) of a wheel rim having a pair of bead seats for tire beads, comprising the step of applying a corrective tape and determining the length ( L ) of a corrective tape as a value within a range from 0.8 to 1.02 times a length  $L_0$  , said length  $L_0$  being defined by the precision expression ( 1 ) or simplified expression ( 2 ) as follows :

$$i. \quad L_0 = \frac{R}{\pi * n} * \arcsine \left( \frac{X}{t * a * 1.3} \right)$$

$$ii. \quad L_0 = \frac{100 * R * X}{360 * t * a * n}$$

$$\text{where } 0 < \frac{L_0}{R} < 0.28$$

Wherein  $L_0$  is a value in mm,

$X$  is a value in mm,

$n$  is a positive integer of the order number of the n – order component

Art Unit: 2859

$t$  is a value in mm,

$a$  is a multiplier which is 0.5 when the corrective tape is applied to one of the bead seats or 1.0 when the corrective tape is applied to both of the bead seats.

$R$  is the circumference in mm of the bead seats,

$\Pi$  is the circle ratio ( $= 3.14159$ ), and

the unit of the argument of arcsine is radian.

in combination with the remaining limitations of the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
